Parent Bonding

Encouraging Social & Emotional Connection

Class Focus

During the early childhood period, when the foundation for a child's physical and mental development is laid, introducing skills of social and sensory interaction in a warm and nurturing environment improves the well being of a child.

Our classes will focus on supporting bonding and encouraging developmental milestones by moving their bodies, singing Japanese songs, interacting with other children. Explore with hands-on activities and music.

Let's cherish those special moments of
"That was fun!" and "I did it!"
